Results of Operations

The primary activity during this initial period was to invest the proceeds of the offering into TD Bank common stock and implement the supplemental covered call writing program. The net asset value per unit was \$19.93 as at November 30, 2007. Distributions to both Class A shareholders and Priority Equity shareholders were made at the targeted rates during the period. The dividend income in the portfolio was supplemented by a limited covered call writing program which provides some additional income to the portfolio.

Recent Developments

The Canadian Institute of Chartered Accountants (CICA) has issued new standards for the fair valuation and recording of portfolio investments for fiscal years beginning on or after October 1, 2006 (see note 2 in the annual financial statements for further details). Basically, the new standards require that portfolio investments be measured based on the last bid price of a security rather than the last traded price (as previously had been the case). The annual financial statements attached reflect these changes. The implementation of these new valuation standards is immaterial to the Company as can be seen in note 2 which presents the actual impact of this change on the net asset value per unit.

Class A Shares – Distributions

Class A shareholders are entitled to receive regular monthly cash dividends initially targeted to be \$0.05 per Class A Share to yield 6% per annum on the original issue price. Dividends paid during the period were made at the targeted rate for a total of \$0.20 per share.

TDb Split Corp.

Notes to Financial Statements

For the period from August 7, 2007 to November 30, 2007

1. Incorporation

TDb Split Corp. (the "Company") is a mutual fund corporation established under the laws of the Province of Ontario on May 24, 2007 and began investment operations on August 7, 2007. The manager of the Company is Quadravest Inc. (the Manager) and the investment manager is Quadravest Capital Management Inc. (Quadravest). All shares outstanding on December 1, 2014, the termination date of the Company, will be redeemed by the Company on that date.

2. Summary of significant accounting policies

These financial statements, prepared in accordance with Canadian generally accepted accounting principles, ("GAAP") include estimates and assumptions by management that affect the reported amount of assets, liabilities, income and expenses during the reporting periods. The following is a summary of the significant accounting policies followed by the Company. Actual results could differ from these estimates.

New Accounting Standards

The Canadian Institute of Chartered Accountants (CICA) issued Section 3855 of the CICA Handbook, "Financial Instruments-Recognition and Measurement", which established standards for the fair valuation and recording of portfolio investments effective for fiscal years beginning on or after October 1, 2006. Section 3855 requires that securities be valued at fair value, which in an active market will commonly be measured based on the last bid price for the security. Prior to October 1, 2006, fair value was most commonly based on the last traded price of a security for the day.

National Instrument 81-106, section 14.2, issued by the Canadian Securities Administrators ("CSA") in 2005, requires the net asset value of an investment fund to be calculated in accordance with Canadian GAAP. NAV per Unit on any given day is equivalent to the difference between the aggregate value of the assets of the Company and the aggregate value of the liabilities (excluding the Priority Equity share liability of the Company) divided by the number of units outstanding on that day. The CSA has granted relief to investment funds from complying on a temporary basis with Section 3855, for the purposes of calculating and reporting net asset value (other than for financial reporting purposes) until September 30, 2008, to permit further review of the impact this pronouncement has on the redemption price of an investment fund ("Transactional"). Depending on the outcome of this review, the method by which net asset value is calculated as governed by Section 3855 may result in a change to the Transactional NAV on such date. In accordance with the relief granted by the CSA, a reconciliation of the net asset value calculated in accordance with Section 3855 of an investment fund (GAAP NAV) is required to be disclosed. The Company has applied this change on a retroprospective basis. The reconciliation of the Company's Transactional NAV (ie. based on last traded price of portfolio securities) and the GAAP NAV (ie. based on last bid price of portfolio securities) is presented in the following table:

	GAAP NAV	Difference	Transactional NAV
November 30, 2007	\$34,591,775	\$281,553	34,873,328
	GAAP NAV per unit	Difference	Transactional NAV per unit
November 30, 2007	\$19.77	\$0.16	\$19.93

TDb Split Corp.

Notes to Financial Statements

For the period from August 7, 2007 to November 30, 2007

2. Summary of significant accounting policies (continued)

Transaction costs

- Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Company are recognized as an expense in the Statement of Operations and Retained Earnings. Prior to December 1, 2006, the Company's policy had been to add these expenses to the costs of securities purchased or deducted from the proceeds of sale. The transaction costs for investments held at November 30, 2007 is shown separately on the Statement of Portfolio Investments. Effective December 1, 2006, the Company adopted the new accounting policy retroactively, without restatement of prior periods. The adoption of the policy does not impact the Transactional NAV or the GAAP NAV.

Valuation of investments

Investments are recorded in the financial statements at their market values at the end of the period, determined as follows:

- Shares or other securities for which market quotations are readily available are valued at the closing bid price.
- Listed options are valued at closing bid prices as reported on recognized exchanges.
- The value of any forward contract will be the market value on the valuation date if the position in the forward contract were to be closed out.

Investment transactions and income recognition

- Investment transactions are accounted for on the trade date.
- Realized gains and losses on investment sales and unrealized appreciation or depreciation in investment values are calculated on the average cost basis.
- Option fees paid or received are deferred and included in investments on the statements of financial position. Realized capital gains or losses are recognized in the statements of operations when options are exercised, expire or are closed out.
- Deferred gains and losses on options are recognized in investments and as a component of net unrealized appreciation (depreciation) in the value of investments in shareholders' equity.
- Dividend income is recognized on the ex-dividend date. Interest income is recognized when earned.
- Net realized gains and losses on investments include net realized gains or losses from foreign currency changes.

Recent accounting pronouncements

In October 2006, the Accounting Standards Board issued CICA Handbook Section 3862, "Financial Instruments-Disclosure" and Section 3863, "Financial Instruments-Presentation". The new standards enhance existing disclosure and presentation of financial instruments and have been carried forward unchanged. The new standards are effective for interim and annual financial statements relating to fiscal years beginning on or after October 1, 2007. These new standards will only impact the disclosure and presentation of financial instruments held by the Company and will not impact the calculation of the Company's assets.
